Entrepreneurship 6: User Adoption Plan (Junior Division)

Umut girls school 2

Tracking kids' and teenagers' locations each day by parents or by official representatives helps to reduce number of accidents. Initially project Rumble based only on crashes involved by trains, later users proposed to integrate rest of danger zones and kids' cell phones to representatives what makes navigation and controlling underage and adult residents as well. Nowadays nor classroom safety rules sessions nor regulations that remains at sheets can be efficient conventionally danger areas what negatively impact residents.

Initially team went to Kyrgyz Rail-Way sub-department in Tokmok city to test an App what been prohibited by staff cause needed official permission from Head Department that must be processed 15 days later after official application of school principal. Decision at once made by team to visit seven families by instructing family members how to use an app and make a deal to test an app 3 days by them who live alongside railways in Kant city, Kyrgyz Republic. Track lines in that city lasted around 2km and total population been 22 000 residents. 2316 of them are kids till 4 years old, 2425 of them at ages 5-9, 2362 of them 10-14 years old and 1848 of them are teenagers.

Girls choose 7 residents who agree fill up the table below №1. Most significant proposals been at user 7 indeed, because app really might bring inconvenience to passengers who each day trip by train. User 7 have been residing close to track line and use each day train service to go school an back that bothers user by app rather than helps. User 4 told second feedback that app is unable to react if app itself switched off or cell phone's geolocation is turned off what typically caused a risk because, users detecting soundless notation would move forwards to danger zone by trusting app that can bring users to accidents. And user 4 made a one of the great suggestion to shuffle in app all danger zones by not restricting app only at railways but it needs integrate two phones to imply this idea. Lastly user 7 again underlined app's downside is still active even cell phone is in static mode.

All above feedbacks possible to fix by recoding app . What we proud of our deal is we made a first most difficult step, rest of steps would complete again by team little by little, time to time. Main idea what we like most, among the feedbacks is integration multi danger zone, negatively impacting kids and switching these zones to parents who able to navigate, monitor and track kids' movements.

Date	Users number	Does app been helpful?	App's strong side	App's downside	Your age	Your proposal	Your score range since 0 to 10	Gender
1th April	User 1	yes	Memorize railways zone	Disturbing much being close railway	9	Design app icon I dislike	7	female
4th April	User 2	Nope	Frequently announce danger	Rapid discharge & switched geolocation	13	No idea	7	male
1th April	User 3	yes	Much notification to user coming railway	Based only on a map based at railways	38	Spot other danger zones and develop track function	8	female
1th April	User 4	Not so much	Memorize railway space	Doesn't work if app and geolocation are off	18	Develop app what processed in turned off mode	4	female
1th April	User 5	Sometimes	Make atten.signal		15	No suggestion	5	female
8th April	User 6	No	Signals	Make dizzy	7	No suggestion	4	male
10th April	User 7	yes	Notifications	Still in process if user motionless	12	Develop function that prevents notifications in case whether user in train or stays in one place	7	male

First, since March 23 our team started propagation how collisions along track lines brings fatal cases at social platform with 102subcribers https://www.instagram.com/umut.girls?igsh=MXkwMHBqN2RrODVyaQ Secondly team members present ***Rumble*** layout publicly in front of public high school students and educator.

Third, team mentors developing official letter to Head of Railway Department proposing reciprocal alliance to access 21 crowded people train transport substations to test an app to have more feedbacks for further improvement. And visit district educational institution what located nearby railways to instruct residents all details regarding app.
